An upside down, egg-shaped shell.
A thin row of teeth on its open belly.
Underneath, pipes line the belly.
Pipes to breathe and detect what's yummy.
It secretes its own jacket and makes it well.
Colorful and vibrant layers, well arranged.
As it crawls with one foot, nice and swell.
The tides, temperature and salinity varies and change.
So they hide during day and come out at night.
They were used as money in the past,
And brought us much delight.

漢字學習單

姓名：

↑ 史上曾經作為貨幣的寶螺貝

↑ 清晨寶螺貝斑斕的外套膜

↑ 寶螺產卵

母螺會守護在受精卵旁邊等待孵化(澎湖)

↑ 典型寶螺棲地

清晨太陽還沒出來，在潮間帶是可以觀察到寶螺貝的。太陽出來後，熱帶陽光直射，水淺的潮間池水溫會迅速上升，更嚴酷的是，很小潮間池內，海水蒸發會導致鹽度迅速提高。所以對寶螺貝來說，太陽出來後的時間是不宜外出的，牠們一般會躲在岩石下的各種縫隙中，晚上才出來活動。

A hard shell on its back,
Protecting it from attacks.
On its stomach, crawling slowly.
On the rocks, it grabs on tightly.
Scraping off moss on the ground,
Filtering through the food around .
When in danger, it's not brave.
It hides in its shell: a safe little cave.
